# Encore.

## *Bring it back. Swipe it. Unlock the drop.*

Zara's second life, run as the main event. Encore Bins turn returned garments into Archive Keys; Style Swipe, closets and city leagues turn circular actions into status; Archive Drops turn keys into the pieces everyone else will find sold out. Built inside the Zara app, on rails Zara already owns.

---

**100,000**
Zara items listed on Vinted every day

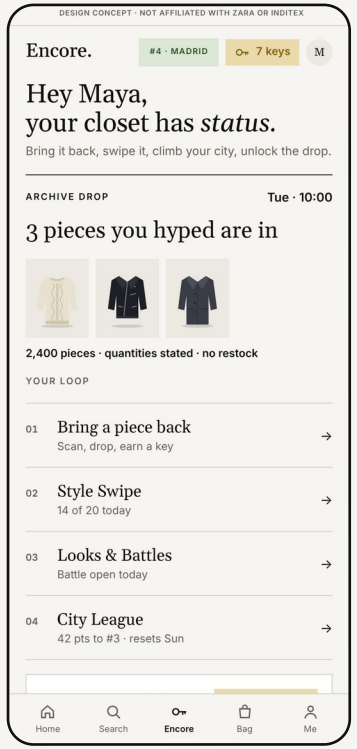

**€0**
what Zara's bin pays for a garment today

**<10 min**
for Galliano Re{form} accessories to sell out

A KEY LANDS

TUESDAY'S DROP

Student concept. Screens are from the team's working prototype with placeholder garment art; not affiliated with or endorsed by Zara or Inditex.

# Secondhand Zara has no status, no date and no drop, so buying new always wins

The moment we target is the closet clean-out: an 18 to 25-year-old decides a Zara piece is done. Today it is listed on Vinted with 61.8 million other Zara items, dropped in a bin that pays €0, or left in the closet. Supply is not the problem; status is. A new drop has a date, an edit, visible scarcity and status for owning it, and secondhand Zara has none of them. Encore gives a returned garment all four and makes bringing it back the only way into the drops Zara's customers already queue for.

## THE STATUS GAP: WHAT A DROP HAS AND SECONDHAND LACKS

| WHAT MAKES A PIECE WANTED | NEW DROP | SECONDHAND | ENCORE |
|---|---|---|---|
| A date and an edit | ✓ | × | ✓ |
| A drop moment | ✓ | × | ✓ |
| Scarcity you can see | ✓ | × | ✓ |
| Status for owning it | ✓ | × | ✓ |
| Trusted condition and fit | ✓ | × | ✓ |
| A reason to bring it back | × | × | ✓ |

## WHY PEOPLE SKIP SECONDHAND (YOUGOV, OCT 2026)

## THE NUMBERS BEHIND THE GAP

**61.8M**
Zara items on Vinted, against 590 monthly searches for "secondhand Zara"

**17,015 t**
came back to Zara bins in 2022 with "no economic benefit"

**32%**
of clothes bought are never worn; 57% feel pressure to keep up (Oxfam 2026)

**0**
loyalty programs at Zara; Bershka's club has 40M members

## WHY NOW

| | |
|---|---|
| **19 Jul 2026** | EU ban on destroying unsold apparel applies |
| **27 Sep 2026** | Green-claims directive: facts only, no vague "sustainable" |
| **17 Apr 2028** | Textile EPR schemes due, fees must penalise fast fashion |

## WHO WE DESIGN FOR

**Maya, 24, Madrid (illustrative).** 14 Zara pieces, 5 unworn for a year, 0 reasons to bring one back. She queued online for the Galliano drop and missed it. She thrifts on Depop for one-of-a-kind finds and posts fits, but has never resold a Zara piece because nothing makes it worth the effort.

**Team survey, Nov 2026, n = [ ]:** [Y]% would bring a piece back for drop access · [Z]% would pay more for a dated, numbered Zara piece than the same piece on Vinted.

## ZARA IS GROWING, NOT FIXING

**€19.8bn**
H1 2026 sales, +9.2% at constant currency; Q3 opened +9%

**58.7%**
gross margin; Zara concepts about 70% of the group

Zara app peaked at 11.1M active users in Europe: the channel already exists.

**Key takeaway** Demand for a worn garment cannot be bought with discounts; it is earned with status. H&M's take-back vouchers were called "an invitation to buy more" and 76% of tracked items were destroyed, exported or warehoused. Encore pays for returns in the one currency Zara's customers already compete for: access to the drop. The format works at Zara: Galliano Re{form} accessories sold out in under ten minutes on 1 October, about €100M of sales from 157 pieces (Jefferies).

**Sources** FashionUnited (2024, 2026) · Marie Claire (2022) · Zara help center (2026) · Inditex SNFI 2022, FY2025, H1 2026 · Sensor Tower (2026) · YouGov (Oct 2026) · Oxfam (2026) · European Commission and Parliament (2026) · Changing Markets (2023) · Sina Finance; Jefferies via Benzinga (Oct 2026)

# Depop made secondhand social; deposits, leagues and earned drops make it a habit

Depop has 7 million active buyers and 3 million sellers, nearly 90% of buyers under 34, and eBay paid about $1.2bn for it in July 2026. It feels like a social feed, not a store: people follow closets, curate a vibe, sell their own pieces and ask each other about fit. 75% of its Gen Z users buy secondhand to reduce consumption, 55% for one-of-a-kind pieces and 45% to keep up with trends. What it lacks is a brand behind the garment. Encore takes Depop's social layer and adds what only Zara can: the label, the store, the drop.

## WHY GEN Z LIVES ON DEPOP, AND WHAT ENCORE BORROWS

| | | |
|---|---|---|
| 01 | **Social-first feed**<br>Likes, follows and curated closets feel like Instagram, not a catalogue grid. | **ENCORE** Looks feed and closet pages with followers; hearts earn points. |
| 02 | **Vibe over transaction**<br>People buy an aesthetic: Y2K, 90s, "Indie Vanguard". Identity, not utility. | **ENCORE** Pieces sold in era edits: "Zara 2012 · Indie Vanguard · No. 0417". |
| 03 | **Micro-entrepreneurship**<br>Anyone can flip finds and become "Depop famous" with a following. | **ENCORE** Sell from your closet on Zara Pre-Owned (+40 pts); Encore Curators. |
| 04 | **Peer-to-peer trust**<br>Buyers chat with sellers about size and styling. | **ENCORE** "Ask about fit" and fit notes from owners in your size (+5 pts). |
| 05 | **Buying with a conscience**<br>75% buy secondhand to reduce consumption (Depop x Bain). | **ENCORE** City goal: every return counts toward what Zara does for the city. |

## PRECEDENTS: WHAT GETS GOODS BACK AND PEOPLE HOOKED

| PRECEDENT | NUMBER | LESSON ENCORE KEEPS |
|---|---|---|
| Germany deposit return | **98%** | of containers return for €0.25 via 135,000 return points: make the return point obvious |
| Trove in-store trade-in | **31%** | of credits redeemed same day; Clare V.: 35% of resale buyers new to brand |
| Nike SNKRS Exclusive Access | **earned** | access won by engagement, bots banned: access is worth more than money |
| H&M vouchers (counter-example) | **76%** | of take-back items destroyed or exported: vouchers drive new buying |
| Rewards meta-analysis, 128 studies | **-0.36 / +0.33** | tangible rewards cut motivation; status and feedback raise it |
| Duolingo leaderboards | **+17%** | learning time; engaged users tripled: weekly leagues work |
| Starbucks Rewards tiers | **~60%** | of US company revenue from 36M members climbing tiers by frequency |
| Spotify Wrapped 2025 | **500M** | shares in days: a season recap people post |
| Beli pairwise ranking | **120M** | rankings of 2M places: taste is a game people play daily |
| Galliano Re{form} at Zara | **<10 min** | to sell out; about €100M from 157 pieces: Zara drops already work |
| Supreme on StockX, H1 2026 | **11% → 41%** | resale premium: a drop you had to earn trades above retail |
| Limited quantity vs limited time | **quantity** | beats time for symbolic brands: state units, never count down |
| Standalone swipe apps | **0 of 3** | survived (Mallzee, Grabble, The Yes): build inside the Zara app |

## FIVE DESIGN RULES WE TOOK AWAY

01 Earned, never bought

02 Status, never discounts

03 Quantities, never timers

04 Inside the Zara app

05 Community first, then rank

**Sources** Retail Gazette (Jul 2026) · Depop x Bain (May 2021) · Depop trend reports (2024-2026) · TOMRA (2026) · Trove (2024) · Complex; Hypebeast (2021, 2023) · Changing Markets (2023) · Deci, Koestner and Ryan (2001) · Lenny's Newsletter (2023) · Starbucks (2026) · TechCrunch (Dec 2025) · Boston Globe (Aug 2026) · Sina Finance; Benzinga (Oct 2026) · StockX via FashionUnited (Aug 2026) · Aggarwal, Jun and Huh (2011) · Retail Dive; DIGIT (2017, 2018)

# Encore Bins turn every Zara label into a key money can’t buy; keys open the drop

Phase 1 bridges store and app: scan the care label, drop the garment in the Encore Bin by the returns counter, and an Archive Key lands once the bin’s reader and scale confirm it. Phase 3 is the reward: every Tuesday at 10:00 keys open three quantity-limited lanes. Keys are never sold, never expire and never discount new product; the key opens the door, money buys the piece. It all rides soft-tag RFID in every store, the NaviLens code on care labels, the Tuesday delivery and Cáritas Moda re-, which already collects 50.9M kg a year.

## PHASE 1 · ENCORE BINS: FOUR STEPS, ABOUT A MINUTE

### 01 At the label

Scan the care label in Store Mode. The reference code returns photo, name and composition, the lookup Pre-Owned already uses. Any Zara piece, any condition, no receipt.

**ZARA** No new hardware: RFID in 90%+ of products; NaviLens on all labels by SS27.

### 02 At the bin

Drop it in the Encore Bin. It weighs the piece; a UHF reader confirms recent RFID labels in ~1 s; older pieces by scan plus weight.

**ZARA** Zebra FX9600 reader, scale, chute: ~€3,000 a bin, ~€6.3M for 2,089 stores.

### 03 In the app

The key lands: 1 per garment, 2 if graded A. A lot number shows where it goes. Capped at 10 keys a month.

**ZARA** Keys cost nothing: an access right, opt-in under GDPR.

### 04 At the DC

Follow the lot: Verified on Pre-Owned, vintage lane, re-cut, or fiber. Owners are told when it sells.

**ZARA** Rides the twice-weekly return run; Cáritas keeps every reusable piece.

## PHASE 3 · ARCHIVE DROPS: THREE LANES EVERY TUESDAY AT 10:00

### Vintage by era — 1 KEY

Graded, cleaned Zara by trend and year. Grade A at the original price, grade B at 70%; never marked down.

**PROOF** Depop: “Indie Vanguard”, “Neo Nostalgia”; Pinterest “dream thrift finds” +550%; 62% of Zalando pre-owned sells in 7 days.

### Re-cut editions — 5 KEYS

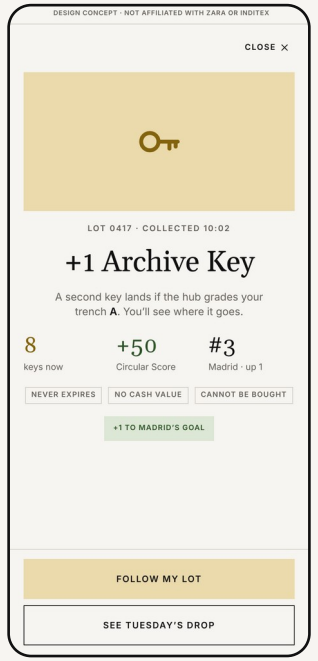

Hand re-cut in the Arteixo cluster from garments graded unwearable; numbered editions of 20 to 200 at Atelier prices.

**PROOF** RE/DONE re-cut 200,000+ Levi’s; TNF Remade $50-400; Zara collab pieces resell at 2-4x.

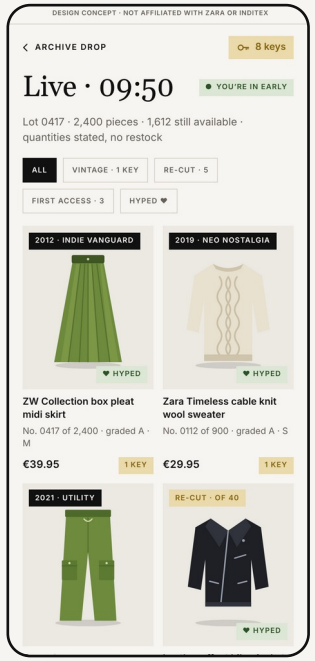

### First access — 3 KEYS

The most wanted new pieces, 24 h before the public, at the same price. Sells out anyway, so it costs Zara nothing.

**PROOF** 73% of Gen Z and Millennials prefer experience rewards like early access (LoyaltyLion).

**IN STORE** Scan, drop, the key lands.

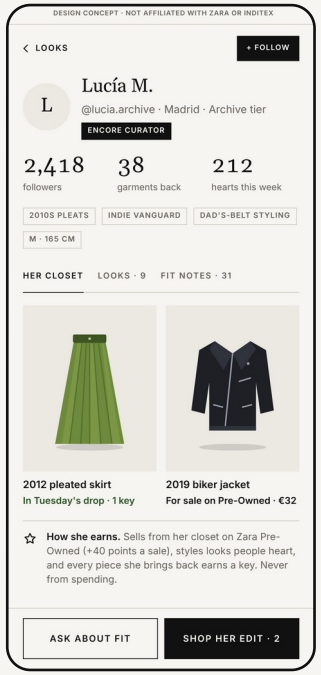

**TUESDAY** Three lanes, quantities stated.

**Rules of the key** Earned only by bringing Zara garments back · no cash value, no expiry, no transfer · never a discount on new product · 10 a month cap and a condition spot check stop gaming · RFID only confirms, the label code identifies (Zara’s RFID can’t survive washing) · claims are facts: “pre-worn, graded A, lot 0417”, never “sustainable”.

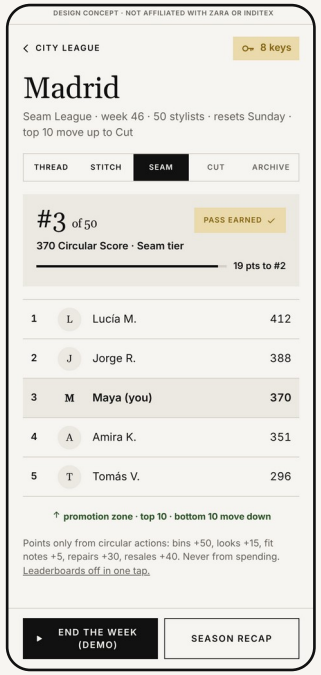

**Sources** Inditex FY2025, H1 2026 · RFID News (Nov 2026) · Avery Dennison (2025, 2026) · Reason Why (Jul 2026) · Zara help center (2026) · Revista Cáritas (Mar 2026) · Zebra via BarcodePlanet (2026) · Depop (2024-2026) · Pinterest (2025) · Zalando (2026) · RE/DONE (2024) · Hypebeast (2020) · Glossy (Mar 2026) · LoyaltyLion (2025) · EUR-Lex Directive 2024/825

# Closets, leagues and a city goal make bringing it back as social as Depop

Phase 2 keeps people in the Zara app between drops. A daily deck of 20 garments teaches the drop each user's taste. Every user has a closet page others follow. Looks, fit notes, returns, repairs and Pre-Owned sales earn a Circular Score that ranks people in a weekly league of 50 in their city, and every return also counts toward one city goal that unlocks something Zara does for everyone. Nothing is earned by spending, nothing expires and nothing counts down.

**CLOSETS** Follow, ask about fit.

**LEAGUE** 50 people, weekly.

## THE DEPOP LAYER: CLOSETS AND CURATORS

Every user has a closet: followers, aesthetic tags, pieces they brought back and where those are now, pieces for sale on Zara Pre-Owned, looks and fit notes.

Follow, heart, "ask about fit", shop someone's edit. Encore Curators are the "Depop famous": status from taste and returns, never spending.

Daily deck of 20: hype or pass; hyped pieces get first word on Tuesday and tell Arteixo what to make (early signals cut forecast error 30% → 9%, HBS).

## CITY GOAL: EVERYONE'S RETURNS ADD UP

| | |
|---|---|
| **25k** | Free repair weekend in every Zara in the city |
| **50k** | 5,000 paid training hours at Cáritas Moda re- |
| **75k** | City votes a re-cut edition; proceeds to Cáritas |
| **100k** | 10,000 trees with the city's parks + Encore night |

Cities race on share of goal (Madrid 61%, Barcelona 54%, London 48%, illustrative). Stated as actions with numbers, never as offsets.

## WHAT KEEPS IT OUT OF SHEIN TERRITORY

No spend points, no expiry, no streaks: the leaked Digital Fairness Act draft (9 Nov 2026) lets users switch off streak rewards, fines up to 6% of turnover.

No countdowns, no "only 3 left", no nagging: the practices in BEUC's 2025 Shein complaint; the Commission opened an addictive-design case on 17 Feb 2026 and fined Temu €200M under the DSA.

Consent first: photos opt in, city declared not tracked, 16+, human plus AI moderation, one tap turns leagues off and keeps every key.

## CITY LEAGUES: FIVE TIERS, WEEKLY, SUNDAY RESET

| TIER | HOW YOU GET THERE | WHAT IT UNLOCKS |
|---|---|---|
| **Thread** | Join; one circular action | Daily deck and the city feed |
| **Stitch** | A week in the top 20 of 50 | Fit notes from owners in your size |
| **Seam** | Top 10 of Stitch, two weeks running | Skip-the-line pass: drops 10 min early |
| **Cut** | Top 10 of Seam + 2 garments back this season | +1 bonus key a month; Style Battle entry |
| **Archive** | Top 5% of the city at season end | +2 keys a season, Insider badge, Encore night, first look at re-cuts |

## CIRCULAR SCORE: POINTS ONLY FOR CIRCULAR ACTIONS

| ACTION | POINTS | CAP | WHY |
|---|---|---|---|
| Bring a garment back | **+50, 1 key (2 if A)** | 10 keys/mo | only way to earn keys |
| Post a look in secondhand | **+15, +5 / 10 hearts** | 50 a post | photos: top trust signal (52%) |
| Fit note on a piece you own | **+5** | 25 a week | fit: 3rd barrier (38%) |
| Repair / Pre-Owned sale | **+30 / +40** | none | displace new buys most (WRAP) |
| Finish the daily deck | **+5** | 35 a week | taste data; no streaks |
| **Buy anything** | **0** | none | status is never bought |

**+17%**
Duolingo learning time with leagues

**60%**
of Starbucks US revenue from tiered members

**500M**
Spotify Wrapped shares: Encore Wrapped each season

**Sources** Retail Gazette (Jul 2026) · Depop x Bain (2021) · HBS Working Knowledge · Lenny's Newsletter, Mazal (2023) · Starbucks Q4 FY26 · TechCrunch (Dec 2025) · Bazaarvoice (Mar 2025) · YouGov (Oct 2026) · WRAP (Feb 2025) · Drèze and Nunes (2009) · Sailer and Homner (2020) · Euronews (Feb, Nov 2026) · BEUC (Jun 2025) · TechPolicy Press (May 2026) · Revista Cáritas (Mar 2026)

# A 20-store, 16-week pilot scored on eight metrics, with the decision rule written first

10 test and 10 control stores in Madrid and London, both Pre-Owned markets. Encore Bins at the returns counter; Style Swipe, closets, the City League and the city goal behind a feature flag in the existing app; one Archive Drop every Tuesday from week 5. Cáritas Moda re- grades and cleans as consignee, so Zara owns no used stock; one partner atelier makes a 200-piece re-cut edition. Every metric comes from systems Zara already runs, so the numbers, not the debate, decide the rollout.

**Weeks 1-2** Bins installed, flag on

**Weeks 3-4** Keys, closets, leagues live

**Week 5** First Tuesday drop

**Week 9** Mid-point read

**Week 16** Decision rule applied

## PILOT DESIGN AND COST (ASSUMPTIONS UNTIL THE PILOT REPORTS)

| LINE | BASIS | COST |
|---|---|---|
| Encore Bins, 10 stores | Reader, antenna, scale, chute, fit-out ~€3,000 each | **€30,000** |
| App features behind a flag | Swipe, closets, Circular Score, leagues, city goal, keys ledger, drop page | **€300,000** |
| Grading and cleaning | 6,000 pieces, Cáritas as consignee at €3-6 a piece | **€27,000** |
| Re-cut edition | 200 pieces, partner atelier ~€40 each, Atelier prices | **€8,000** |
| Drops, signage, training | Existing Tuesday deliveries; 30-min counter module | **€35,000** |
| **Total pilot** | **16 weeks, 20 stores** | **~€400,000** |

**Full scale** Bins in all 2,089 Zara stores ~€6.3M once; app layer ~€2-3M to build, €1M a year to run (team estimates). Keys cost nothing. At a 58.7% gross margin it pays for itself if 2M key holders lift spend 2%, against McKinsey's +10% for active loyalty members and +25% for redeemers.

## EIGHT METRICS, EACH WITH A PUBLISHED BENCHMARK AND A PILOT BAR

| METRIC | DEFINITION | BENCHMARK (SOURCE) | PILOT BAR |
|---|---|---|---|
| Drop-off to key use | Keys used for a drop within 30 days | Over half of Clare V. trade-in credit spent same day (Trove) | **40% in 30 days** |
| Incremental spend | Key holders vs matched control, 90 days | Members +10%, redeemers +25% (McKinsey) | **+10% vs control** |
| Community stickiness | DAU/MAU of league and closet cohort; D30 | 20% good, 25% excellent (Phiture); Duolingo ~40% | **20%; D30 10%** |
| Bin throughput and grade | Garments per bin per week; share A or B | Patagonia 80% resellable; H&M 60% to reuse | **150/wk; 60%** |
| Drop sell-through | Units sold in 14 days, no markdown | 62% of Zalando pre-owned in 7 days | **70%** |
| New-to-brand share | Drop buyers with no Zara buy in 12 months | 35% of Clare V. resale buyers new (Trove) | **20%** |
| Virgin material displaced | Resold x weight x 64.6%, plus fiber reused | Resale displaces 64.6%, repair 82.2% (WRAP) | **per lot, not 1:1** |
| Time to earn | Median days, first scan to first drop | 49.1% say rewards take too long (Antavo) | **under 14 days** |

**Decision rule, written before the pilot** Scale to Spain, the UK and France if after 16 weeks: (1) bins take 150+ garments a week, 60%+ resellable; (2) 40%+ of keys used within 30 days; (3) drops sell 70%+ at full price in 14 days; (4) key holders spend 10%+ more than control, with new-purchase frequency not rising faster than circular actions. Two of four earns a second season; fewer folds bins into the Cáritas flow.

**Risks and the answer** Unwashable RFID: the label code identifies. "Little archive": the archive is customers' closets, 61.8M pieces on Vinted. Shein backlash: no spend rewards, expiry or timers. Cannibalization: nothing discounted; first access is to pieces that sell out anyway. Charity displacement: Cáritas keeps every reusable garment. Claims law: facts and lot numbers.

**Sources** McKinsey (2021) · Trove (2024) · ThredUp (2025, 2026) · Antavo (2026) · Duolingo (Feb 2026) · Phiture (2026) · Patagonia via Trellis (Oct 2026) · H&M Group (2026) · Zalando (2026) · WRAP (Feb 2025) · Zebra via BarcodePlanet (2026) · Inditex FY2025 and H1 2026 · team cost model, all inputs labeled as assumptions
